4. B738 FMS Trainer

Flight Management Systems Trainer is a unique hardware and software solution for advanced training.

Basic version of the FMS Trainer:

- MCP, EFIS, CDU, PFD & ND (display units).
- Throttle quadrant and landing gear represented on a touch screen.
- Customized setups available on request.

Flight training applications:

Allows students to learn and practice operations and programming all phases of the flight.

Non-standard situations can be safely trained in a classroom with the assistance of an instructor and guiding you through all phases of the flight.

The FMS Trainer introduces crew members to FMS programming at an early stage.

Well-prepared student pilots mean effective training in a Full Flight Simulator !

WARRANTY AND MAINTENANCE

We offer a standard 24-months warranty period with excellent post-delivery service.

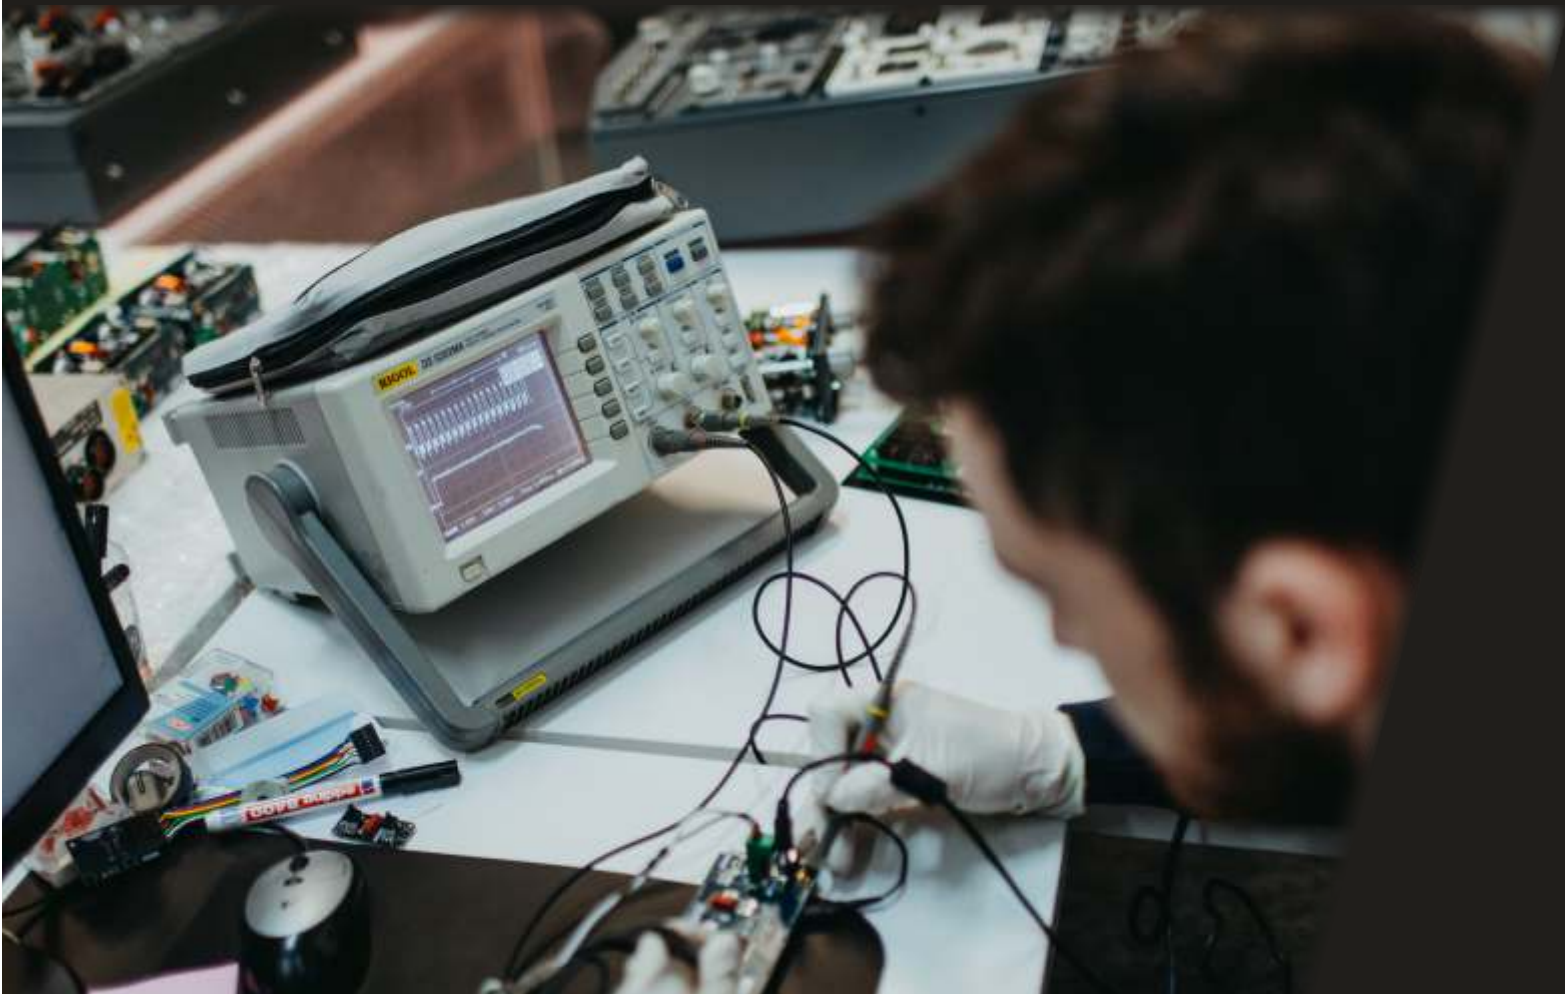

We want to make sure that you are satisfied with our simulator enabling you to deliver the best quality training in the market. In case of any issues, our team is available for you 24/7.

A dedicated post-sales software interface is provided to communicate and report any issue with the simulator.

Thanks to the high build quality of our simulators there is nearly no maintenance required.

Modular structure allows for quick and easy servicing. We maintain surplus stock of all the most critical parts and equipment (MCP, NAV, CDU, EFIS, etc.) to ensure a quick response and minimum downtime possible.

Most diagnostics, repairs and adjustments can be performed remotely. FTD.aero will make every effort necessary to effectively and timely solve each warranty claim in cooperation with the Operator.

FTD.aero is building a network of partners and suppliers to offer diverse training solutions tailored to your needs.
